

# SLAP PATCH<sup>®</sup>

## FOR EMERGENCY ROOF REPAIRS

WORKS ON WET OR UNDERWATER SURFACES

FOR USE ON ALL COMMERCIAL ROOFS INCLUDING EPDM RUBBER ROOFS

**CAN BE APPLIED WET OR UNDERWATER!**

Slap Patch is a super strong, rubberized semi-permanent waterproof patch that can bond, seal and repair virtually everything. Very easy to use, just slap it on and you're done! Perfect for temporary roof repairs during wet emergency conditions. Can be applied on wet or underwater surfaces!

Slap Patch is reinforced and creates semi-permanent long-lasting repairs even underwater. Perfect for making watertight, durable repairs on all commercial roofs including EPDM. Slap Patch instantly seals out water, air and moisture to create a super strong, flexible, watertight barrier.

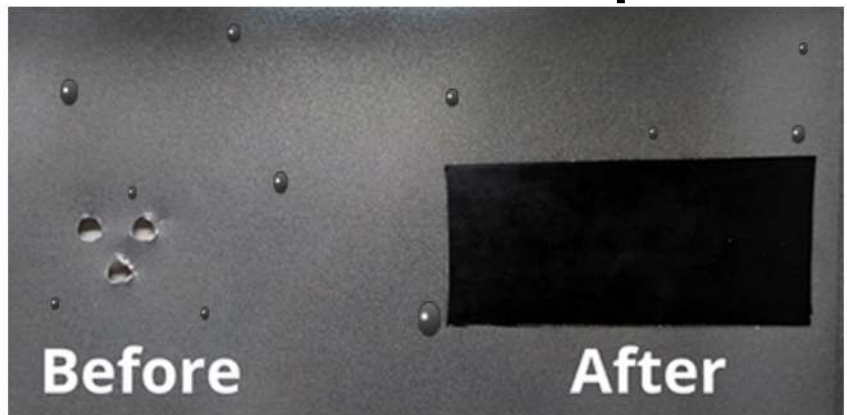

This patch is UV resistant, environmentally friendly, VOC-free and has a wide temperature range so it can be used in extreme weather conditions. Slap Patch bonds to all hard surfaces.

**Just Peel-It & Seal-It. It's that simple!**

## Wet Metal Roof Repair

**Works on EPDM too...**

**Applying Slap Patch Repair Patch is as easy as 1...2...3...**

1. Cut Slap Patch into any size you want. Place remaining material back in protective bag.
- 2 Remove white backing tape to expose the sticky resin. Apply Slap Patch to repair area with sticky side down and press firmly.
- 3 After applying patch remove the transparent film backing on the top side of the patch. That's it, you're done!
