

SUPER QUICK CONCRETE SHIELD

MAKES EXTERIOR TRUCK & EQUIPMENT MAINTENANCE A BREEZE

NON-CORROSIVE & BIODEGRADABLE

- Improves appearance
- Easier clean-up
- Protects against rust, corrosion, and oxidation

Super Quick Concrete Shield is a heavy duty release agent designed to help protect and keep trucks and equipment clean and looking like new. It is easy to apply and very durable. For excellent results, just follow these steps:

1. Use Super Quick Concrete Shield as is; do NOT dilute with water.
2. Make sure that the equipment surfaces are clean and dry.
3. Using a clean cloth dampened with Super Quick Concrete Shield, apply a thin uniform coating to the entire truck or equipment including the aluminum rims and allow to dry thoroughly.
4. Super Quick Concrete Shield will attract dust before it is totally cured (about 24 hours). When this occurs, buff off dust with a clean dry cloth.
5. Repeat when necessary.

Do not apply to vehicle control surfaces, it will cause them to be slippery.
