

MR. MELT

Ice & Snow Melt for Winter Safety

MELTS ICE & SNOW FAST

Mr. Melt Ice & Snow Melt gives a fast acting and safe granular ice and snow melter. Designed to solve every ice melting problem safely, quickly and economically without mess, excessive labor or inconvenience. Specially formulated with ice crystal modifiers and inhibitors creating a highly effective ice melter that is less harmful to concrete and vegetation than traditional ice melters. Like all deicers, this will detain the refreezing of melted snow and ice for hours. Ice and snow melter can be used on asphalt, concrete, brick, cement and most surfaces.

Includes a blend of high active calcium chloride, magnesium chloride and urea in addition to a great blue/green color indicator.

Details:

- With heat catalyst for efficient melting below -15 deg. F.
- Melts ice and snow fast from driveways, walks, stairways, etc.
- Contains corrosion inhibitors and soil softeners
- Provides greater traction while working
- Provides instant traction under car wheels
- Less tracking and residue than other deicers
- More uniform granular compound is ideal for mechanical spreaders
- Less harmful to concrete and vegetation

Directions:

Do not overuse. Use only 2-4 oz. (1/2 to 1 cup) per square yard. Sprinkle evenly over surface. Shovel slush off of treated area as soon as possible. Do not apply directly to vegetation.

Available in 50 lb. bag,
50 lb. box, and 100 lb. keg
