

# My Glue

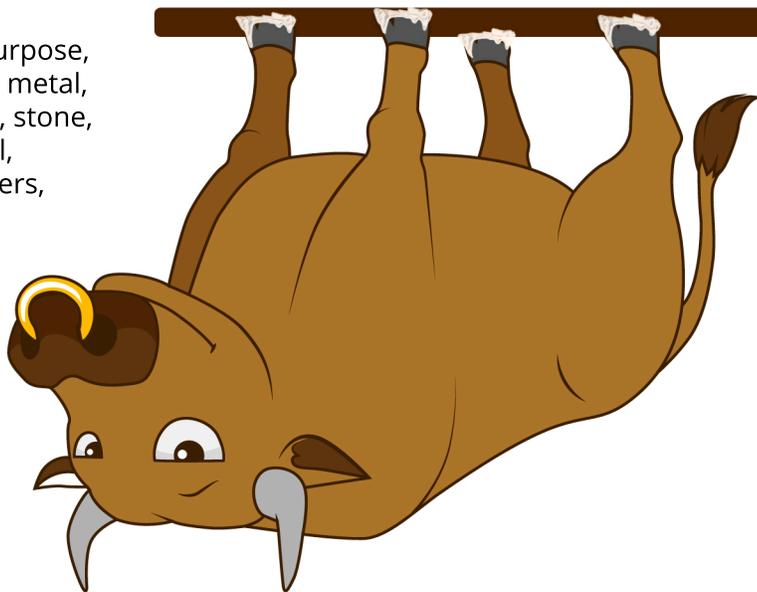

## WORKS ON WET OR DRY SURFACES

My Glue is an easy-to-use, flexible, non-drip all purpose, underwater epoxy glue. Sticks to wet or dry: PVC, metal, wood, plastic, iron, inflatables, glass, plastic, vinyl, stone, fiberglass, plexiglass, acrylic, pools, stainless steel, fountains, spas, tile fabric, pumps, drains, skimmers, tanks, filters, toys, boats, pipes, furniture, and aquariums.

Flexible, toughened, non-corrosive, structural adhesive specifically designed for various applications and substrates, including wet or dry bonding of ABS, PVC, flexible PVC, CRS, composites, wood and cement.

My Glue is ok to paint and sand, and resists shock, shrinkage, expansion and vibration. My Glue has been formulated for superior peel,

impact and fatigue resistance. It's toughness, imparted by flexibility, causes the energy to break a bond to be significantly higher than brittle epoxies. Lap Shear Psi, plus high break-energy Psi afford bonds strength/resiliency.

### Pro-Facts:

- Resists shock, shrinkage, expansion and vibration
- Sticks to Wet or Dry Surfaces
- Non-corrosive
- Superior peel, impact and fatigue resistance
- Significantly higher energy required to break bond compared to brittle epoxies
- Lap Shear Psi, plus high break-energy Psi
- Tensile Strength = 1200+ Psi
- Aquarium Safe – Passed DOHS (Title 22) Hazardous Waste BioAssay using flathead minnows under CA Dept. of Fish and Game guidelines
- Easy to Use, Non-Drip
- Paint and Sand OK
- Can be used underwater (sticky underwater)
- Fills gaps
- All weather adhesive

### Ideal For Use On:

- ABS, PVC, Flexible PVC, CRS, Composites, Wood, Cement, Plastic, Iron, Stainless Steel, Plexiglass, Acrylic, Metal and Fiberglass
- Toys and Inflatables, Pools and Spas, Fountains and Tile
- Boats, Pipes, Furniture, Aquariums
