

# RIDE-IT RUST CONVERTER

**THE LATEST RUST PREVENTION AND COATING TECHNOLOGY FOR MAXIMUM CORROSION PROTECTION FOR ALL IRON AND STEEL SURFACES.**

Ride-It Rust Converter applies directly over the rusty metal surface – no messy grinding, blasting, acid etching or lengthy surface preparation is required. The water based, ready-to-use formula is safer to handle because it is non-flammable and emits no hazardous fumes.

This rust converter chemically neutralizes rust and leaves a tough, long term, rust preventative coating. Seals, protects and prolongs the life of ferrous metal. Once dry, the treated area will be darker in color and more uniform in appearance with a durable, protective finish that can be painted if desired.

Each gallon covers up to 500 square feet of surface area. Clean up is easy and fast with soap and hot water.

## Pro-Facts:

- The latest rust prevention and coating technology for maximum corrosion protection for all iron and steel surfaces
- High content of tough, durable acrylic resins for maximum film integrity and long last protection
- Applies directly over the rusty metal surface – no messy grinding, blasting, acid etching or lengthy surface preparation is required
- Treated surfaces are primed and ready for paint in 24 hours, or may even be left unpainted
- Provides an ideal basecoat for epoxies, urethanes, chlorinated rubber, and enamel paints
- The water based, ready-to-use formula is safer to handle because it is non-flammable and emits no hazardous fumes
- Each aerosol can covers up to 25 square feet of surface area, each gallon covers up to 500 square feet of surface area
- Permanent protection against rust – lasts up to 5 times longer than conventional primers and paints
- Eliminates laborious preparation – application is made directly over rusty surfaces
- Saves time and money – restores corroded metal for longer life and reduced maintenance
